

MATERNITY: Scoring sheet - staff (maternity & neonatal)

Question	Total number of staff interviewed	Number of opt outs	Number remaining (Total minus number of opt outs) (B)	Number giving adequate response (A)	Percentage giving adequate response (A ÷ B) x 100		Action required
					Your result	Standard	
(Standard 1) Staff understand...							
1a - The importance of developing a relationship					%	(80%)	
1b - How to encourage this process					%	(80%)	
1c - What information mothers-to-be may need					%	(80%)	
1d - The principles of effective communication					%	(80%)	
(Standard 2) Staff understand...							
2a - The importance of skin-to-skin contact					%	(80%)	
2b - How long skin-to-skin contact should last					%	(80%)	
(Standard 3) Staff can describe / demonstrate...							
3a - Key principles of positioning					%	(80%)	
3b - How babies attach to the breast					%	(80%)	
3c - The signs of effective attachment					%	(80%)	
3d - The importance of effective attachment relationships					%	(80%)	

Question	Total number of staff interviewed	Number of opt outs	Number remaining (Total minus number of opt outs) (B)	Number giving adequate response (A)	Percentage giving adequate response (A ÷ B) x 100		Action required
					Your result	Standard	
3e - The signs a baby is receiving enough breastmilk					%	(80%)	
3f - What is meant by responsive feeding					%	(80%)	
3g - Why hand expressing is useful					%	(80%)	
3h - How to support a mother with hand expressing					%	(80%)	
(Standard 4) Staff understand...							
4a - Why supplements should be avoided					%	(80%)	
4b - How to support a mother when a baby is reluctant to feed					%	(80%)	
4c - Information needed by mothers who use formula					%	(80%)	
4d – How to support a mother to bottle feed responsively					%	(80%)	
4e - Why it is important to avoid allowing advertising for formula milks					%	(80%)	
(Standard 5) Staff understand...							
5a - The importance of close and loving relationships					%	(80%)	
5b - How to encourage close and loving					%	(80%)	

MATERNITY: Scoring sheet – breastfeeding mother

Question	Total number of mothers interviewed	Number of opt outs	Number remaining (Total minus number of opt outs) (B)	Number giving adequate response (A)	Percentage giving adequate response (A ÷ B) x 100		Action required
					Your result	Standard	
(Standard 2) Birth							
2a - Mother held baby in skin contact after birth					%	(80%)	
2b - Mother held baby for at least an hour / for as long as she wished					%	(80%)	
2c - Mother was supported with breastfeeding at that time					%	(80%)	
(Standard 3) Learning about breastfeeding							
3a - Mother was supported to position and attach					%	(80%)	
3b - Mother knows signs of effective feeding					%	(80%)	
3c - Mother was shown how to hand express breastmilk					%	(80%)	
3d - Mother knows about responsive feeding					%	(80%)	
3e - Mother was given information about sources of help/support					%	(80%)	
3f - Mother confirmed that breastfeeding assessment carried out effectively					%	(80%)	

Question	Total number of mothers interviewed	Number of opt outs	Number remaining (Total minus number of opt outs) (B)	Number giving adequate response (A)	Percentage giving adequate response (A ÷ B) x 100		Action required
					Your result	Standard	
(Standard 4) Food and fluids other than breastmilk							
4a - The baby has not received anything other than breastmilk					%	(80%)	
(Standard 5) Relationship building							
5a - Mother had discussion about the importance of closeness and comfort					%	(80%)	
5b - Mother was given information on what enhances closeness and responsiveness					%	(80%)	
5c - Mother confirmed her baby had roomed in in hospital					%	(80%)	
(Standard 1) Antenatal care							
1a - Mother had a discussion appropriate to needs about comforting and caring					%	(80%)	
1b - Had a discussion appropriate to needs about feeding her baby					%	(80%)	
General							
6a – Mother had conversation about keeping babies safe when they are asleep					%	(80% advisory)	

6b – Mother had information about keeping babies safe when they are asleep					%	(80% advisory)	
6c – Mother happy with overall care					%	very happy	
					%	fairly happy	
					%	unhappy	
6d – Staff were kind and considerate					%	always	
					%	mostly	
					%	sometimes	
					%	not at all	

MATERNITY: Scoring sheet – bottle feeding mother

Question	Total number of mothers interviewed	Number of opt outs	Number remaining (Total minus number of opt outs) (B)	Number giving adequate response (A)	Percentage giving adequate response (A ÷ B) x 100		Action required
					Your result	Standard	
Birth							
2a - Mother held baby in skin contact after birth					%	(80%)	
2b - Mother held her baby for at least an hour / for as long as she wished					%	(80%)	
2c - Mother gave first feed in skin contact					%	(80%)	
Learning about bottle feeding							
4a - Mother knows to feed when baby displays feeding cues					%	(80%)	
4b - Mother knows how to bottle feed responsively					%	(80%)	
4c - Mother was given appropriate information about making up feeds					%	(80%)	
4d - Mother was advised to use first milk					%	(80%)	
Relationship building							
5a - Mother had discussion about the importance of closeness and comfort					%	(80%)	

Question	Total number of mothers interviewed	Number of opt outs	Number remaining (Total minus number of opt outs) (B)	Number giving adequate response (A)	Percentage giving adequate response (A ÷ B) x 100		Action required
					Your result	Standard	
5b - Mother was given information on what enhances closeness & responsiveness					%	(80%)	
5c - Mother confirmed her baby had roomed in in hospital					%	(80%)	
Antenatal care							
1a - Mother had a discussion appropriate to needs about comforting and caring					%	(80%)	
1b - Mother had a discussion appropriate to needs about feeding her baby					%	(80%)	
General							
6a – Mother had conversation about keeping babies safe when they are asleep					%	(80% advisory)	
6b – Mother had information about keeping babies safe when they are asleep					%	(80% advisory)	
6c – Mother happy with overall care					%	very happy	
					%	fairly happy	
					%	unhappy	
6d – Staff were kind and considerate					%	always	
					%	mostly	
					%	sometimes	
					%	not at all	

MATERNITY: Scoring sheet – mother with baby on the neonatal unit

Question	Total number of mothers interviewed	Number of opt outs	Number remaining (Total minus number of opt outs) (B)	Number giving adequate response (A)	Percentage giving adequate response $(A \div B) \times 100$		Action required
					Your result	Standard	
Skin contact							
2 - Mother and baby had skin contact as soon as possible after birth					%	(80%)	
Learning about breastfeeding							
3a - Mother was encouraged to express					%	(80%)	
3b - Mother was offered help with expressing as soon as possible					%	(80%)	
3c - Mother was shown how to express by hand and by pump					%	(80%)	
3d - Mother was advised to express at least 8 times in 24 hours					%	(80%)	
3e - Mother was given information on sources of help and support					%	(80%)	
Importance of breastmilk							
1 - Mother had opportunity for discussion as early as possible					%	(80%)	

General

6c – Mother happy with overall care					%	very happy
					%	fairly happy
					%	unhappy
6d – Staff were kind and considerate					%	always
					%	mostly
					%	sometimes
					%	not at all

SUPPLEMENTATION: Intermittent audit results

FROM THE SUPPLEMENTATION AUDIT FORM FOR INTERMITTENT AUDIT

Total number of breastfeeding mothers interviewed (B)		
Number of breastfed babies given supplements (A):		
Percentage of breastfed babies given supplements: (A divided by B x 100)		
Reason for supplement	Number of babies supplemented for this reason	Percentage of supplements given for this reason*
Clinically indicated with optimum care given		
Clinically indicated but care could be improved		
Fully informed maternal decision		
Maternal request without fully informed decision		
Staff suggestion for non-clinical reasons		
Action required:		

SUPPLEMENTATION: Continuous audit results

FROM THE SUPPLEMENTATION AUDIT FORM FOR CONTINUOUS AUDIT

Audit period From:		To:	
Number of breastfed babies cared for during audit period(B):			
Number of breastfed babies given supplements during audit period (A):			
Percentage of breastfed babies given supplements during audit period: (A divided by B x 100)			
Reason for supplement	Number of babies supplemented for this reason	Percentage of supplements given for this reason*	
Clinically indicated with optimum care given			
Clinically indicated but care could be improved			
Fully informed maternal decision			
Maternal request without fully informed decision			
Staff suggestion for non-clinical reasons			
Action required:
